

## CONSENSUS ASSESSMENTS INITIATIVE QUESTIONNAIRE v3.1

Control Domain	Control ID	Question ID	Control Specification	Consensus Assessment Questions	Consensus Assessment Answers			Notes
					Yes	No	Not Applicable	
Application & Interface Security <i>Application Security</i>	AIS-01	AIS-01.1	Applications and programming interfaces (APIs) shall be designed, developed, deployed, and tested in accordance with leading industry standards (e.g., OWASP for web applications) and adhere to applicable legal, statutory, or regulatory compliance obligations.	Do you use industry standards (i.e. OWASP Software Assurance Maturity Model, ISO 27034) to build in security for your Systems/Software Development Lifecycle (SDLC)?	X			As a general, the software applications developed implement security concepts, based on OWASP recommendations and ISO Standard
		AIS-01.2		Do you use an automated source code analysis tool to detect security defects in code prior to production?		X		There are multiple kinds of application security tests
		AIS-01.3		Do you use manual source-code analysis to detect security defects in code prior to production?	X			Does not rely on software suppliers, tests are carried out in a similar way to the internally developed code
		AIS-01.4		Do you verify that all of your software suppliers adhere to industry standards for Systems/Software Development Lifecycle (SDLC) security?	X			Multiple scanning techniques be used before the promotion of code into production.
		AIS-01.5		(SaaS only) Do you review your applications for security vulnerabilities and address any issues prior to deployment to production?	X			In accordance with the GDPR and privacy by design principles
Application & Interface Security <i>Customer Access Requirements</i>	AIS-02	AIS-02.1	Prior to granting customers access to data, assets, and information systems, identified security, contractual, and regulatory requirements for customer access shall be addressed.	Are all identified security, contractual, and regulatory requirements for customer access contractually addressed and remediated prior to granting customers access to data, assets, and information systems?	X			Requirements and trust levels for client access are established contractually
		AIS- 02.2		Are all requirements and trust levels for customers' access defined and documented?	X			Typically, there is no gaps in either protection of, or accountability for personal Data Security Architecture
Application & Interface Security <i>Data Integrity</i>	AIS-03	AIS-03.1	Data input and output integrity routines (i.e., reconciliation and edit checks) shall be implemented for application interfaces and databases to prevent manual or systematic processing errors, corruption of data, or Policies and procedures shall be established and maintained in support of data security to include (confidentiality, integrity, and availability) across multiple system interfaces, jurisdictions, and business functions to prevent improper disclosure, alternation, or destruction.	Does your data management policies and procedures require audits to verify data input and output integrity routines?	X			are designed in line with CSA. As a general principle the continuous protection of personal data across the entire domain, whether the personal data is at rest, in motion or in use from initial collection through to destruction Data is
Application & Interface Security <i>Data Security / Integrity</i>	AIS-04	AIS-04.1		Are data input and output integrity routines (i.e. MD5/SHA checksums) implemented for application interfaces and databases to prevent manual or systematic processing errors or corruption of data?	X			
Audit Assurance & Compliance <i>Audit Planning</i>	AAC-01	AAC-01.1	Audit plans shall be developed and maintained to address business process disruptions. Auditing plans shall focus on reviewing the effectiveness of the implementation of security operations. All audit activities must be agreed upon prior to executing any audits.	Do you develop and maintain an agreed upon audit plan (e.g., scope, objective, frequency, resources, etc.) for reviewing the efficiency and effectiveness of implemented security controls?	X			Periodically are performed internal and external audits
		AAC-01.2		Does your audit program take into account effectiveness of implementation of security operations?	X			In accordance with our security incident management process
Audit Assurance & Compliance <i>Independent Audits</i>	AAC-02	AAC-02.1	Independent reviews and assessments shall be performed at least annually to ensure that the organization addresses nonconformities of established policies, standards, procedures, and compliance obligations.	Do you allow tenants to view your SOC2/ISO 27001 or similar third-party audit or certification reports?	X			on customer request
		AAC-02.2		Do you conduct network penetration tests of your cloud service infrastructure at least annually?	X			In accordance with the company security baselines and the ISO / IEC 27001 standard recommendations. Currently carried out internally
		AAC-02.3		Do you conduct application penetration tests of your cloud infrastructure regularly as prescribed by industry best practices and guidance?	X			In accordance with the company security baselines and the ISO / IEC 27001 standard recommendations. Currently carried out internally
		AAC-02.4		Do you conduct internal audits at least annually?	X			
		AAC-02.5		Do you conduct independent audits at least annually?	X			Periodically or on customer request
		AAC-02.6		Are the results of the penetration tests available to tenants at their request?	X			Executive Summary is available upon request and NDA subscription
		AAC-02.7		Are the results of internal and external audits available to tenants at their request?	X			upon customer request and NDA subscription

Audit Assurance & Compliance Information System Regulatory Mapping	AAC-03	AAC-03.1	Organizations shall create and maintain a control framework which captures standards, regulatory, legal, and statutory requirements relevant for their business needs. The control framework shall be reviewed at least annually to ensure changes that could affect the business processes are reflected.	Do you have a program in place that includes the ability to monitor changes to the regulatory requirements in relevant jurisdictions, adjust your security program for changes to legal requirements, and ensure compliance with relevant regulatory requirements?	X			Meeting and Workshop are organized to evaluate treats, vulnerabilities, the policies and regulatory requirements governing privacy conformanceand takes decisions
Business Continuity Management & Operational Resilience Business Continuity Planning	BCR-01	BCR-01.1	A consistent unified framework for business continuity planning and plan development shall be established, documented, and adopted to ensure all business continuity plans are consistent in addressing priorities for testing, maintenance, and information security requirements. Requirements for business continuity plans include the following: • Defined purpose and scope, aligned with relevant dependencies	Does your organization have a plan or framework for business continuity management or disaster recovery management?	X			
		BCR-01.2		Do you have more than one provider for each service you depend on?		X		
		BCR-01.3		Do you provide a disaster recovery capability?	X			
		BCR-01.4		Do you monitor service continuity with upstream providers in the event of provider failure?	X			
		BCR-01.5		Do you provide access to operational redundancy reports, including the services you rely on?	X			On customer request
		BCR-01.6		Do you provide a tenant-triggered failover option?		X		Failover isn't automatic
		BCR-01.7		Do you share your business continuity and redundancy plans with your tenants?	X			On customer request
Business Continuity Management & Operational Resilience Business Continuity Planning	BCR-02	BCR-02.1	Business continuity and security incident response plans shall be subject to testing at planned intervals or upon significant organizational or environmental changes. Incident response plans shall involve impacted customers (tenant) and other business relationships that represent critical intra-supply chain business process dependencies.	Are business continuity plans subject to testing at planned intervals or upon significant organizational or environmental changes to ensure continuing effectiveness?	X			Business continuity plans are regularly tested at least on an annual basis
Business Continuity Management & Operational Resilience	BCR-03	BCR-03.1	Data center utilities services and environmental conditions (e.g., water, power, temperature and humidity controls, telecommunications, and internet connectivity) shall be secured, monitored, maintained, and	Does your organization adhere to any international or industry standards when it comes to securing, monitoring, maintaining and testing of datacenter utilities services and environmental conditions?			X	As SaaS provider, we rely on
		BCR-03.2		Has your organization implemented environmental controls, fail-over mechanisms or other redundancies to secure utility services and mitigate environmental conditions?			X	qualified infrastructure provider
Business Continuity Management & Operational Resilience Documentation	BCR-04	BCR-04.1	Information system documentation (e.g., administrator and user guides, and architecture diagrams) shall be made available to authorized personnel to ensure the following: • Configuring, installing, and operating the information system • Effectively using the system's capabilities	Are information system documents (e.g., administrator and user guides, architecture diagrams, etc.) made available to authorized personnel to ensure configuration, installation and operation of the information system?	X			technical documentation is provided authorized technical staff
Business Continuity Management & Operational Resilience Environmental Risks	BCR-05	BCR-05.1	Physical protection against damage from natural causes and disasters, as well as deliberate attacks, including fire, flood, atmospheric electrical discharge, solar induced geomagnetic storm, wind, earthquake, tsunami, explosion, nuclear accident, volcanic activity, biological hazard, civil unrest, mudslide, tectonic activity, and other forms of natural or man-made disaster shall be anticipated, designed, and have countermeasures	Is physical damage anticipated and are countermeasures included in the design of physical protections?			X	As SaaS provider, we rely on qualified Infrastructure provider
Business Continuity Management & Operational Resilience Equipment Location	BCR-06	BCR-06.1	To reduce the risks from environmental threats, hazards, and opportunities for unauthorized access, equipment shall be kept away from locations subject to high probability environmental risks and supplemented by redundant equipment located at a reasonable distance.	Are any of your data centers located in places that have a high probability/occurrence of high-impact environmental risks (floods, tornadoes, earthquakes, hurricanes, etc.)?			X	As SaaS provider, we rely on qualified Infrastructure provider. It guarantees the data centers located
Business Continuity Management & Operational Resilience	BCR-07	BCR-07.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for equipment maintenance, security, continuity and availability of operations and Protection measures shall be put into place to react to natural and man-made threats based upon a geographically-specific business impact assessment.	Do you have documented policies, procedures and supporting business processes for equipment and datacenter maintenance?			X	As SaaS provider, we rely on qualified Infrastructure
Business Continuity Management & Operational Resilience Equipment Power	BCR-08	BCR-07.2		Do you have an equipment and datacenter maintenance routine or plan?			X	
		BCR-08.1		Are security mechanisms and redundancies implemented to protect equipment from utility service outages (e.g., power failures, network disruptions, etc.)?			X	As SaaS provider, we rely on qualified Infrastructure provider. It guarantees that sector's best practices were redundant
Business Continuity Management & Operational Resilience	BCR-09	BCR-09.1	There shall be a defined and documented method for determining the impact of any disruption to the organization (cloud provider, cloud consumer) that must incorporate the following: • Identify critical products and services	Do you use industry standards and frameworks to determine the impact of any disruption to your organization (i.e. criticality of services and recovery priorities, disruption tolerance, RPO and RTO etc) ?	X			In accordance with ISO Standards
		BCR-09.2		Does your organization conduct impact analysis pertaining to possible disruptions to the cloud service?	X			In accordance with ISO Standards
Business Continuity Management & Operational Resilience Policy	BCR-10	BCR-10.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for appropriate IT governance and service management to ensure appropriate planning, delivery and support of the organization's IT capabilities supporting business functions, workforce, and/or customers based on industry acceptable standards (i.e., ITIL v4 and COBIT 5). Additionally, policies and procedures shall include defined roles and responsibilities supported by	Are policies and procedures established and made available for all personnel to adequately support services operations' roles?	X			In accordance with ISO Standards
Business Continuity Management & Operational Resilience Retention Policy	BCR-11	BCR-11.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for defining and adhering to the retention period of any critical asset as per established policies and procedures, as well as applicable legal, statutory, or regulatory compliance obligations. Backup and recovery measures shall be incorporated as part of business continuity planning and tested accordingly for effectiveness.	Do you have technical capabilities to enforce tenant data retention policies?	X			Retention policy is managed
		BCR-11.2		Do you have documented policies and procedures demonstrating adherence to data retention periods as per legal, statutory or regulatory compliance requirements?	X			In line with GDPR and contractual agreements
		BCR-11.3		Have you implemented backup or recovery mechanisms to ensure compliance with regulatory, statutory, contractual or business requirements?	X			
		BCR-11.4		If using virtual infrastructure, does your cloud solution include independent hardware restore and recovery capabilities?	X			As SaaS provider, we rely on qualified Infrastructure provider. It guarantees that guarantee the replacement of the assigned hardware
		BCR-11.5		If using virtual infrastructure, do you provide tenants with a capability to restore a virtual machine to a previous configuration?			X	We do not allow to Clients to admins the VMs
		BCR-11.6		Does your cloud solution include software/provider independent restore and recovery capabilities?	X			
		BCR-11.7		Do you test your backup or redundancy mechanisms at least annually?	X			

Change Control & Configuration Management <i>New Development / Acquisition</i>	CCC-01	CCC-01.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to ensure the development and/or acquisition of new data, physical or virtual applications, infrastructure network and systems components, or any corporate, operations and/or data center facilities have been pre-authorized by the organization's business leadership or other	Are policies and procedures established for management authorization for development or acquisition of new applications, systems, databases, infrastructure, services, operations and facilities?	X			In accordance with quality procedures
Change Control & Configuration Management <i>Outsourced</i>	CCC-02	CCC-02.1	External business partners shall adhere to the same policies and procedures for change management, release, and testing as internal developers within the organization (e.g., ITIL service management processes).	Are policies and procedures for change management, release, and testing adequately communicated to external business partners?	X			In accordance with quality procedures
		CCC-02.2		Are policies and procedures adequately enforced to ensure external business partners comply with change management requirements?	X			In accordance with quality procedures
Change Control & Configuration Management <i>Quality Testing</i>	CCC-03	CCC-03.1	Organizations shall follow a defined quality change control and testing process (e.g., ITIL Service Management) with established baselines, testing, and release standards which focus on system availability, confidentiality, and integrity of systems and services.	Do you have a defined quality change control and testing process in place based on system availability, confidentiality, and integrity?	X			In accordance with quality procedures
		CCC-03.2		Is documentation describing known issues with certain products/services available?	X			Is implemented a problem Management that controls the registration, processing and documentation of fault messages (incidents), problems, known errors.
		CCC-03.3		Are there policies and procedures in place to triage and remedy reported bugs and security vulnerabilities for product and service offerings?	X			
		CCC-03.4		Do you have controls in place to ensure that standards of quality are being met for all software development?	X			
		CCC-03.5		Do you have controls in place to detect source code security defects for any outsourced software development activities?	X			
		CCC-03.6		Are mechanisms in place to ensure that all debugging and test code elements are removed from released software versions?	X			
Change Control & Configuration Management <i>Unauthorized Software</i>	CCC-04	CCC-04.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to restrict the installation of unauthorized software on organizationally-owned or managed user end-point devices (e.g., issued workstations, laptops, and mobile devices) and IT infrastructure network and systems components.	Do you have controls in place to restrict and monitor the installation of unauthorized software onto your systems?	X			
Change Control & Configuration Management <i>Production Changes</i>	CCC-05	CCC-05.1	Policies and procedures shall be established for managing the risks associated with applying changes to: • Business-critical or customer (tenant)-impacting (physical and virtual) applications and system-system interface (API) designs and configurations.	Do you provide tenants with documentation that describes your production change management procedures and their roles/rights/responsibilities within it?	X			On customer request
		CCC-05.2		Do you have policies and procedures established for managing risks with respect to change management in production environments?	X			
		CCC-05.3		Do you have technical measures in place to ensure that changes in production environments are registered, authorized and in adherence with existing SLAs?	X			Is Maintained an continuous deployment process
Data Security & Information Lifecycle Management <i>Classification</i>	DSI-01	DSI-01.1	Data and objects containing data shall be assigned a classification by the data owner based on data type, value, sensitivity, and criticality to the organization.	Do you provide a capability to identify data and virtual machines via policy tags/metadata (e.g., tags can be used to limit guest operating systems from booting/instantiating/transporting data in the wrong country)?	X			Are maintained cloud asset inventory
		DSI-01.2		Do you provide a capability to identify data and hardware via policy tags/metadata/hardware tags (e.g., TXT/TPM, VN-Tag, etc.)?	X			As SaaS provider, we rely on qualified Infrastructure provider that manage and maintain hardware
Data Security & Information Lifecycle Management <i>Data Inventory / Data Security &amp; Information Lifecycle Management</i>	DSI-02	DSI-02.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to inventory, document, and maintain data flows for data that is resident (permanently or temporarily) within the service's geographically	Do you inventory, document, and maintain data flows for data that is resident (permanent or temporary) within the services' applications and infrastructure network and systems?	X			In line with GDPR and data processor accordance
		DSI-02.2		Can you ensure that data does not migrate beyond a defined geographical residency?	X			In line with GDPR and data processor accordance
	DSI-03	DSI-03.1	Data related to electronic commerce (e-commerce) that traverses public networks shall be appropriately classified and protected from fraudulent activity, unauthorized disclosure, or modification in such a manner to prevent contract dispute and compromise of data.	Do you provide standardized (e.g. ISO/IEC) non-proprietary encryption algorithms (3DES, AES, etc.) to tenants in order for them to protect their data if it is required to move through public networks (e.g., the Internet)?			X	Typically, data are encrypted in transit using TLS 1.2.
		DSI-03.2		Do you utilize open encryption methodologies any time your infrastructure components need to communicate with each other via public networks (e.g., Internet-based replication of data from one environment to another)?			X	communications between infrastructure components
Data Security & Information Lifecycle Management <i>Handling / Inhalation</i>	DSI-04	DSI-04.1	Policies and procedures shall be established for labeling, handling, and the security of data and objects which contain data. Mechanisms for label inheritance shall be implemented for objects that act as aggregate containers for data.	Are policies and procedures established for data labeling and handling in order to ensure the security of data and objects that contain data?	X			Standard within GDPR compliant and ISO standard recommendations
		DSI-04.2		Do you follow a structured data-labeling standard (e.g., ISO 15489, Oasis XML Catalog Specification, CSA data type guidance)?			X	
		DSI-04.3		Are mechanisms for label inheritance implemented for objects that act as aggregate containers for data?			X	
Data Security & Information Lifecycle Management <i>Nonproduction Data</i>	DSI-05	DSI-05.1	Production data shall not be replicated or used in non-production environments. Any use of customer data in non-production environments requires explicit, documented approval from all customers whose data is affected, and must comply with all legal and regulatory requirements for retention of sensitive data.	Do you have procedures in place to ensure production data shall not be replicated or used in non-production environments?	X			recommendations of the ISO standard and GDPR
Data Security & Information Lifecycle Management <i>Ownership / Stewardship</i>	DSI-06	DSI-06.1	All data shall be designated with stewardship, with assigned responsibilities defined, documented, and communicated.	Are the responsibilities regarding data stewardship defined, assigned, documented, and communicated?	X			As agreed in th term of service, privacy policy and related documents
Data Security & Information Lifecycle Management <i>Secure Disposal</i>	DSI-07	DSI-07.1	Policies and procedures shall be established with supporting business processes and technical measures implemented for the secure disposal and complete removal of data from all storage media, ensuring data is not recoverable by any computer forensic means.	Do you support the secure deletion (e.g., degaussing/cryptographic wiping) of archived and backed-up data?	X			Wipe mechanism is performed
		DSI-07.2		Can you provide a published procedure for exiting the service arrangement, including assurance to sanitize all computing resources of tenant data once a customer has exited your environment or has vacated a resource?	X			As documented in the Privacy policy and term of service
Datacenter Security <i>Asset Management</i>	DCS-01	DCS-01.1	Assets must be classified in terms of business criticality, service-level expectations, and operational continuity requirements. A complete inventory of business critical assets located at all sites and/or	Do you classify your assets in terms of business criticality, service-level expectations, and operational continuity requirements?	X			Part of Asset management processes according to ISO Standard
		DCS-01.2		Do you maintain a complete inventory of all of your critical assets located at all sites/ or geographical locations and their assigned ownership?	X			
Datacenter Security <i>Controlled Access Points</i>	DCS-02	DCS-02.1	Physical security perimeters (e.g., fences, walls, barriers, guards, gates, electronic surveillance, physical authentication mechanisms, reception desks, and security patrols) shall be implemented to safeguard sensitive data and information systems.	Are physical security perimeters (e.g., fences, walls, barriers, guards, gates, electronic surveillance, physical authentication mechanisms, reception desks, and security patrols) implemented for all areas housing sensitive data and information systems?			X	physical security measures are adopts by the infrastructure provider
Datacenter Security <i>Equipment Identification</i>	DCS-03	DCS-03.1	Automated equipment identification shall be used as a method of connection authentication. Location-aware technologies may be used to validate connection authentication integrity based on known equipment location.	Do you have a capability to use system geographic location as an authentication factor?			X	As SaaS provider, we rely on qualified Infrastructure provider that including equipment identification
		DCS-03.2		Is automated equipment identification used as a method to validate connection authentication integrity based on known equipment location?			X	

Datacenter Security <i>Offsite Authorization</i>	DCS-04	DCS-04.1	Authorization must be obtained prior to relocation or transfer of hardware, software, or data to an offsite premises.	Is authorization obtained prior to relocation or transfer of hardware, software, or data to an offsite premises?	X			Customer authorization is requested
Datacenter Security <i>Offsite Equipment</i>	DCS-05	DCS-05.1	Policies and procedures shall be established for the secure disposal of equipment (by asset type) used outside the organization's premise. This shall include a wiping solution or destruction process that renders recovery of information impossible. The erasure shall consist of a full write of the drive to ensure that the erased drive is released to inventory for reuse and deployment or securely stored until it can be destroyed.	Can you provide tenants with your asset management policies and procedures?			X	Service is implemented on DataCenter of the qualified Infrastructure provider
Datacenter Security <i>Policy</i>	DCS-06	DCS-06.1	Policies and procedures shall be established, and supporting business processes implemented, for maintaining a safe and secure working environment in offices, rooms, facilities, and secure areas storing sensitive information.	Can you provide evidence that policies, standards, and procedures have been established for maintaining a safe and secure working environment in offices, rooms, facilities, and secure areas?	X			Service is implemented on DataCenter of the qualified provider infrastructure that ensures compliance with regulations
		DCS-06.2		Can you provide evidence that your personnel and involved third parties have been trained regarding your documented policies, standards, and procedures?	X			Session training are performed
Datacenter Security <i>Secure Area Authorization</i>	DCS-07	DCS-07.1	Ingress and egress to secure areas shall be constrained and monitored by physical access control mechanisms to ensure that only authorized personnel are allowed access.	Are physical access control mechanisms (e.g. CCTV cameras, ID cards, checkpoints) in place to secure, constrain and monitor egress and ingress points?	X			Service is implemented on DataCenter of the qualified provider infrastructure that ensures compliance with regulations
Datacenter Security <i>Unauthorized Persons Entry</i>	DCS-08	DCS-08.1	Ingress and egress points such as service areas and other points where unauthorized personnel may enter the premises shall be monitored, controlled and, if possible, isolated from data storage and processing facilities to prevent unauthorized data corruption, compromise, and loss.	Are ingress and egress points, such as service areas and other points where unauthorized personnel may enter the premises, monitored, controlled and isolated from data storage and process?	X			Service is implemented on DataCenter of the qualified provider infrastructure that ensures compliance with regulations
Datacenter Security <i>User Access</i>	DCS-09	DCS-09.1	Physical access to information assets and functions by users and support personnel shall be restricted.	Do you restrict physical access to information assets and functions by users and support personnel?	X			Service is implemented on DataCenter of the qualified provider infrastructure that ensures guarantees the support of technical team
Encryption & Key Management <i>Entitlement</i>	EKM-01	EKM-01.1	Keys must have identifiable owners (binding keys to identities) and there shall be key management policies.	Do you have key management policies binding keys to identifiable owners?		X		All the network traffic is using the latest encryption standards
Encryption & Key Management <i>Key Generation</i>	EKM-02	EKM-02.1	Policies and procedures shall be established for the management of cryptographic keys in the service's cryptosystem (e.g., lifecycle management from key generation to revocation and replacement, public key infrastructure, cryptographic protocol design and algorithms used, access controls in place for secure key generation and exchange and	Do you have a capability to allow creation of unique encryption keys per tenant?		X		
		EKM-02.2		Do you have a capability to manage encryption keys on behalf of tenants?		X		
		EKM-02.3		Do you maintain key management procedures?		X		
		EKM-02.4		Do you have documented ownership for each stage of the lifecycle of encryption keys?		X		
		EKM-02.5		Do you utilize any third party/open source/proprietary frameworks to manage encryption keys?		X		
Encryption & Key Management <i>Encryption</i>	EKM-03	EKM-03.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for the use of encryption protocols for protection of sensitive data in storage (e.g., file servers, databases, and end-user workstations) and data in transmission (e.g., custom interfaces, over public networks, and electronic messaging).	Do you encrypt tenant data at rest (on disk/storage) within your environment?		X		
		EKM-03.2		Do you leverage encryption to protect data and virtual machine images during transport across and between networks and hypervisor instances?	X			In the event of travel, virtual machines are encrypted during transport
		EKM-03.3		Do you have documentation establishing and defining your encryption management policies, procedures, and guidelines?		X		
		EKM-04.1		Do you have platform and data appropriate encryption that uses open/validated formats and standard algorithms?		X		
		EKM-04.2		Are your encryption keys maintained by the cloud consumer or a trusted key management provider?		X		
Encryption & Key Management <i>Storage and Access</i>	EKM-04	EKM-04.3	Platform and data appropriate encryption (e.g., AES-256) in open/validated formats and standard algorithms shall be required. Keys shall not be stored in the cloud (i.e. at the cloud provider in question), but maintained by the cloud consumer or trusted key management.	Do you store encryption keys in the cloud?		X		
		EKM-04.4		Do you have separate key management and key usage duties?		X		
Governance and Risk Management <i>Baseline Requirements</i>	GRM-01	GRM-01.1		Do you have documented information security baselines for every component of your infrastructure (e.g., hypervisors, operating systems, routers, DNS servers, etc.)?	X			
		GRM-01.2		Do you have the capability to continuously monitor and report the compliance of your infrastructure against your information security baselines?	X			ISO 27001 and ISO 9001, both externally audited on an annual basis
Governance and Risk Management <i>Risk Assessments</i>	GRM-02	GRM-02.1		Does your organization's risk assessments take into account awareness of data residency, legal and statutory requirements for retention periods and data protection and classification?	X			Standard within GDPR
		GRM-02.2	Managers are responsible for maintaining awareness of, and complying with, security policies, procedures, and standards that are relevant to their area of responsibility.	Do you conduct risk assessments associated with data governance requirements at least once a year?	X			
Governance and Risk Management <i>Management Oversight</i>	GRM-03	GRM-03.1		Are your technical, business, and executive managers responsible for maintaining awareness of and compliance with security policies, procedures, and standards for both themselves and their employees as they pertain to the manager and employees' area of responsibility?	X			In accordance with ISO Standards, security policy are implemented and monitored in considering the characteristics of the business, location, asset and technology, legal and regulatory environment and stakeholders needs
Governance and Risk Management <i>Management Program</i>	GRM-04	GRM-04.1	An Information Security Management Program (ISMP) shall be developed, documented, approved, and implemented that includes administrative, technical, and physical safeguards to protect assets and data from loss, misuse, unauthorized access, disclosure, alteration, and destruction. The security program shall include, but not be limited to, the following: a) Information security policy; b) Information security standards; c) Information security procedures; d) Information security controls; e) Information security training; f) Information security awareness; g) Information security incident response; h) Information security risk management; i) Information security business continuity; j) Information security compliance; k) Information security monitoring; l) Information security reporting; m) Information security documentation; n) Information security communication; o) Information security improvement; p) Information security evaluation; q) Information security assessment; r) Information security audit; s) Information security certification; t) Information security accreditation; u) Information security conformity assessment; v) Information security management system; w) Information security management system certification; x) Information security management system accreditation; y) Information security management system conformity assessment; z) Information security management system certification and accreditation.	Do you provide tenants with documentation describing your Information Security Management Program (ISMP)?		X		On customer request
		GRM-04.2		Do you review your Information Security Management Program (ISMP) at least once a year?		X		In accordance with the company security baselines and Solari has planned the standard certification to ISO 27001
Governance and Risk Management <i>Support / Improvement</i>	GRM-05	GRM-05.1	Executive and line management shall take formal action to support information security through clearly-documented direction and commitment, and shall ensure the action has been assigned.	Do executive and line management take formal action to support information security through clearly-documented direction and commitment, and ensure the action has been assigned?	X			Is Established executive leadership and commitment to operationalizing

Governance and Risk Management Policy	GRM-06	GRM-06.1	Information security policies and procedures shall be established and made readily available for review by all impacted personnel and external business relationships. Information security policies must be authorized by the organization's business leadership (or other accountable business role or function) and supported by a strategic business plan and an information security management program inclusive of defined information security roles and responsibilities for business leadership.	Are your information security policies and procedures made available to all impacted personnel and business partners, authorized by accountable business role/function and supported by the information security management program as per industry best practices (e.g., ISO 27001, SOC 2)?	X			In accordance with ISO Standards
		GRM-06.2		Are information security policies authorized by the organization's business leadership (or other accountable business role or function) and supported by a strategic business plan and an information security management program inclusive of defined information security roles and responsibilities for business leadership?	X			
		GRM-06.3		Do you have agreements to ensure your providers adhere to your information security and privacy policies?	X			
		GRM-06.4		Can you provide evidence of due diligence mapping of your controls, architecture, and processes to regulations and/or standards?	X			On customer request
		GRM-06.5		Do you disclose which controls, standards, certifications, and/or regulations you comply with?	X			Certificates are available if required
Governance and Risk Management	GRM-07	GRM-07.1	A formal disciplinary or sanction policy shall be established for employees who have violated security policies and procedures. Risk assessment results shall include updates to security policies, procedures, standards, and controls to ensure that they remain relevant and effective.	Is a formal disciplinary or sanction policy established for employees who have violated security policies and procedures?	X			Based on ISO Standards and part of standard
Governance and Risk Management	GRM-08	GRM-07.2		Are employees made aware of what actions could be taken in the event of a violation via their policies and procedures?	X			
Business / Policy Change Impacts		GRM-08.1		Do risk assessment results include updates to security policies, procedures, standards, and controls to ensure they remain relevant and effective?	X			Review adequacy of existing security policies, standards, guidelines and procedures in accordance with ISO standard and recommendations
Governance and Risk Management Policy Reviews	GRM-09	GRM-09.1	The organization's business leadership (or other accountable business role or function) shall review the information security policy at planned intervals or as a result of changes to the organization to ensure its continuing alignment with the security strategy, effectiveness, accuracy, relevance, and applicability to the local, national, and international regulations.	Do you notify your tenants when you make material changes to your information security and/or privacy policies?	X			Clients are informed through the institutional website, mail in relation to changes privacy policies
		GRM-09.2		Do you perform, at minimum, annual reviews to your privacy and security policies?	X			
Governance and Risk Management Assessments	GRM-10	GRM-10.1	Aligned with the enterprise-wide framework, formal risk assessments shall be performed at least annually or at planned intervals, (and in conjunction with any changes to information systems) to determine the likelihood and impact of all identified risks using qualitative and quantitative methods. The likelihood and impact associated with	Are formal risk assessments aligned with the enterprise-wide framework and performed at least annually, or at planned intervals, determining the likelihood and impact of all identified risks, using qualitative and quantitative methods?	X			Regular risk assessments are conducted according to ISO standards
		GRM-10.2		Is the likelihood and impact associated with inherent and residual risk determined independently, considering all risk categories?	X			Impact and likelihood of risks shall be determined using statistical method
Governance and Risk Management Human Resources Asset Returns	GRM-11	GRM-11.1	Risks shall be mitigated to an acceptable level. Acceptance levels based on risk criteria shall be established and documented in accordance with	Do you have a documented, organization-wide program in place to manage risk?	X			Covered as part of ISO 9001
		GRM-11.2		Do you make available documentation of your organization-wide risk management program?	X			On customer request
Human Resources Background Screening	HRS-01	HRS-01.1	Upon termination of workforce personnel and/or expiration of external business relationships, all organizationally-owned assets shall be returned within an established period.	Upon termination of contract or business relationship, are employees and business partners adequately informed of their obligations for returning organizationally-owned assets?	X			In consideration of the quality system procedures and contractual terms of the
		HRS-01.2		Do you have asset return procedures outlining how assets should be returned within an established period?	X			
Human Resources	HRS-02	HRS-02.1	Pursuant to local laws, regulations, ethics, and contractual constraints, all employment candidates, contractors, and third parties shall be subject to background verification proportional to the data classification to be accessed, the business requirements, and acceptable risk.	Pursuant to local laws, regulations, ethics, and contractual constraints, are all employment candidates, contractors, and involved third parties subject to background verification?	X			
Human Resources Employment Agreements	HRS-03	HRS-03.1	Employment agreements shall incorporate provisions and/or terms for adherence to established information governance and security policies and must be signed by newly hired or on-boarded workforce personnel (e.g., full or part-time employee or contingent staff) prior to granting workforce personnel user access to corporate facilities, resources, and	Do your employment agreements incorporate provisions and/or terms in adherence to established information governance and security policies?	X			
		HRS-03.2		Do you require that employment agreements are signed by newly hired or on-boarded workforce personnel prior to granting workforce personnel user access to corporate facilities, resources, and assets?	X			
Human Resources Employment	HRS-04	HRS-04.1	Roles and responsibilities for performing employment termination or change in employment procedures shall be assigned, documented, and Policies and procedures shall be established, and supporting business processes and technical measures implemented, to manage business risks associated with permitting mobile device access to corporate resources and may require the implementation of higher assurance compensating controls and acceptable-use policies and procedures (e.g., mandated security training, stronger identity, entitlement and access	Are documented policies, procedures, and guidelines in place to govern change in employment and/or termination?	X			Employee management procedures are maintained,
Human Resources Portable / Mobile Devices	HRS-05	HRS-04.2		Do the above procedures and guidelines account for timely revocation of access and return of assets?	X			
		HRS-05.1		Are policies and procedures established and measures implemented to strictly limit access to your sensitive data and tenant data from portable and mobile devices (e.g., laptops, cell phones, and personal digital assistants (PDAs)), which are generally higher-risk than non-portable devices (e.g., desktop computers at the provider organization's facilities)?	X			No mobile device can be interfaced with the data of the system host client. There are established instructions
Human Resources Non-Disclosure Agreements	HRS-06	HRS-06.1	Requirements for non-disclosure or confidentiality agreements reflecting the organization's needs for the protection of data and operational details shall be identified, documented, and reviewed at planned intervals.	Are requirements for non-disclosure or confidentiality agreements reflecting the organization's needs for the protection of data and operational details identified, documented, and reviewed at planned intervals?	X			The requirements for confidentiality agreements relating to data protection are established
Human Resources Roles / Responsibilities	HRS-07	HRS-07.1	Roles and responsibilities of contractors, employees, and third-party users shall be documented as they relate to information assets and security.	Do you provide tenants with a role definition document clarifying your administrative responsibilities versus those of the tenant?	X			Roles and responsibilities are documented when using the SaaS solution.
Human Resources Acceptable Use	HRS-08	HRS-08.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, for defining allowances and conditions for permitting use of organizationally-owned or managed user end-point devices and IT infrastructure network and systems components?	Do you have policies and procedures in place to define allowances and conditions for permitting usage of organizationally-owned or managed user end-point devices and IT infrastructure network and systems components?	X			The use of company devices is governed by specific instructions, provided and
		HRS-08.2		Do you define allowance and conditions for BYOD devices and its applications to access corporate resources?		X		
Human Resources Training / Awareness	HRS-09	HRS-09.1	A security awareness training program shall be established for all contractors, third-party users, and employees of the organization and mandated when appropriate. All individuals with access to organizational data shall receive appropriate awareness training and regular updates in organizational procedures, processes, and policies relating to their professional function relative to the organization.	Do you provide a formal, role-based, security awareness training program for cloud-related access and data management issues (e.g., multi-tenancy, nationality, cloud delivery model, segregation of duties implications, and conflicts of interest) for all persons with access to tenant data?		X		All employees complete annual Information Security Awareness training based to a specific role and responsibilities, in accordance with ISO standards, GDPR
		HRS-09.2		Do you specifically train your employees regarding their specific role and the information security controls they must fulfill?	X			
		HRS-09.3		Do you document employee acknowledgment of training they have completed?	X			
		HRS-09.4		Is successful and timed completion of the training program(s) considered a prerequisite for acquiring and maintaining access to sensitive systems?		X		
		HRS-09.5		Are personnel trained and provided with awareness programs at least once a year?	X			
		HRS-09.6		Are administrators and data stewards properly educated on their legal responsibilities with regard to security and data integrity?	X			
Human Resources User Responsibility	HRS-10	HRS-10.1	All personnel shall be made aware of their roles and responsibilities for: <ul style="list-style-type: none"> <li>• Maintaining awareness and compliance with established policies and</li> </ul>	Are personnel informed of their responsibilities for maintaining awareness and compliance with published security policies, procedures, standards, and applicable regulatory requirements?	X			Based on ISO standard, processes and standard

Human Resources Workspace	HRS-11	HRS-10.2	procedures and applicable legal, statutory, or regulatory compliance obligations.	Are personnel informed of their responsibilities for maintaining a safe and secure working environment?	X			processes and standard employment terms
		HRS-10.3		Are personnel informed of their responsibilities for ensuring that equipment is secured and not left unattended?	X			Internal rules and
		HRS-11.1		Are all computers and laptops configured such that there is lockout screen after a pre-defined amount of time?	X			recommendations and good
		HRS-11.2		Are there policies and procedures to ensure that unattended workspaces do not have openly visible (e.g., on a desktop) sensitive documents?	X			practices
Identity & Access Management	IAM-01	IAM-01.1	Access to, and use of, audit tools that interact with the organization's information systems shall be appropriately segmented and restricted to prevent compromise and misuse of log data.	Do you restrict, log, and monitor access to your information security management systems (e.g., hypervisors, firewalls, vulnerability scanners, network sniffers, APIs, etc.)?	X			Segregation of access control roles (e.g. access request, access
Identity & Access Management	IAM-02	IAM-01.2		Do you monitor and log privileged access (e.g., administrator level) to information security management systems?	X			De-provisioning process is in place
		IAM-02.1		Do you have controls in place ensuring timely removal of systems access that is no longer required for business purposes?	X			Access to assets is regulated on ISO Standard
		IAM-02.2		Do you have policies, procedures and technical measures in place to ensure appropriate data/assets access management in adherence to legal, statutory or regulatory compliance requirements?	X			Refer on Access control policy on ISO standard
		IAM-02.3		Do you have procedures and technical measures in place for user account entitlement de-/provisioning based on the rule of least privilege?	X			An access control policy should be detailed and documented. Solaris SpA should determine in this document the appropriate access control rules, access rights and restrictions for specific user roles towards the processes and procedures related to
		IAM-02.4		Do you have procedures and technical measures in place for data access segmentation in multi-tenant system architectures?	X			Multifactor authentication is not available
		IAM-02.5		Do you enforce data access permissions based on the rules of Authentication, Authorization and Accountability (AAA)?	X			Systems access is removed within 2 business days as when change in the user's role takes place
		IAM-02.6	<ul style="list-style-type: none"> <li>Procedures, supporting roles, and responsibilities for provisioning and de-provisioning user account entitlements following the rule of least privilege based on job function (e.g., internal employee and contingent staff personnel changes, customer-controlled access, suppliers' business relationships, or other third-party business relationships)</li> <li>Business case considerations for higher levels of assurance and multi-factor authentication secrets (e.g., management interfaces, key generation, remote access, segregation of duties, emergency access, large-scale provisioning or geographically-distributed deployments, and personnel redundancy for critical systems)</li> <li>Access segmentation to sessions and data in multi-tenant architectures by any third party (e.g., provider and/or other customer (tenant)</li> <li>Identity trust verification and service-to-service application (API) and</li> </ul>	Do your policies and procedures incorporate security controls for establishing higher levels of assurance for critical business case considerations, supported by multifactor authentication?		X		configuration ports is reserved only for system administrators
		IAM-02.7		Do you provide metrics to track the speed with which you are able to remove systems access that is no longer required for business purposes?	X			Identity management is in place. Refer on Access
Identity & Access Management	IAM-03	IAM-03.1	User access to diagnostic and configuration ports shall be restricted to authorized individuals and applications.	Is user access to diagnostic and configuration ports restricted to authorized individuals and applications?	X			They are defined contractually. There are technical documents that inform the customer about the basic security measures
Identity & Access Management	IAM-04	IAM-04.1	Policies and procedures shall be established to store and manage identity information about every person who accesses IT infrastructure	Do you manage and store the identity of all personnel who have access to the IT infrastructure, including their level of access?	X			Refer on Information security roles and responsibilities
Identity & Access Management	IAM-05	IAM-05.1	User access policies and procedures shall be established, and supporting business processes and technical measures implemented, for restricting user access as per defined segregation of duties to address business risks associated with a user-role conflict of interest.	Do you manage and store the user identity of all personnel who have network access, including their level of access?	X			Risks related to third party and access controls is performed as part of risk
Identity & Access Management	IAM-06	IAM-06.1	Access to the organization's own developed applications, program, or object source code, or any other form of intellectual property (IP), and use of proprietary software shall be appropriately restricted following the rule of least privilege based on job function as per established user	Are controls in place to prevent unauthorized access to your application, program, or object source code, and assure it is restricted to authorized personnel only?	X			Client must approve the access to their data in case of support. SOLARI staff is not allowed to access client data unless emergency
		IAM-06.2		Are controls in place to prevent unauthorized access to tenant application, program, or object source code, and assure it is restricted to authorized personnel only?	X			Clients are responsible for controls related to their usage of the SaaS platform
Identity & Access Management	IAM-07	IAM-07.1	The identification, assessment, and prioritization of risks posed by business processes requiring third-party access to the organization's information systems and data shall be followed by coordinated	Does your organization conduct third-party unauthorized access risk assessments?	X			Excessive access rights should be clearly defined and assigned to limited specific members. Access is monitored and audit log collected
Identity & Access Management	IAM-08	IAM-07.2		Are preventive, detective corrective compensating controls in place to mitigate impacts of unauthorized or inappropriate access?	X			There is a process of releasing credentials
		IAM-08.1	Policies and procedures are established for permissible storage and access of identities used for authentication to ensure identities are only accessible based on rules of least privilege and replication limitation only to users explicitly defined as business necessary.	Do you document how you grant, approve and enforce access restrictions to tenant/customer credentials following the rules of least privilege?	X			Is allow only access to published SaaS platform
		IAM-08.2		Based on the rules of least privilege, do you have policies and procedures established for permissible storage and access of identities used for authentication?	X			Periodic access checks are performed to validate appropriate access provisioning. Access is revoked if the members is terminated
		IAM-08.3		Do you limit identities' replication only to users explicitly defined as business necessary?	X			
Identity & Access Management	IAM-09	IAM-09.1	Provisioning user access (e.g., employees, contractors, customers (tenants), business partners and/or supplier relationships) to data and organizationally-owned or managed (physical and virtual) applications, infrastructure systems, and network components shall be authorized by the organization's management prior to access being granted and	Does your management provision the authorization and restrictions for user access (e.g., employees, contractors, customers (tenants), business partners, and/or suppliers) prior to their access to data and any owned or managed (physical and virtual) applications, infrastructure systems, and network components?	X			
Identity & Access Management		IAM-09.2		Do you provide upon the request of users with legitimate interest access (e.g., employees, contractors, customers (tenants), business partners and/or suppliers) to data and any owned or managed (physical and virtual) applications, infrastructure systems and network components?		X		
Identity & Access Management	IAM-10	IAM-10.1	User access shall be authorized and revalidated for entitlement appropriateness, at planned intervals, by the organization's business leadership or other accountable business role or function supported by evidence to demonstrate the organization is adhering to the rule of least privilege based on job function. For identified access violations, remediation must follow established user access policies and	Do you require a periodical authorization and validation (e.g. at least annually) of the entitlements for all system users and administrators (exclusive of users maintained by your tenants), based on the rule of least privilege, by business leadership or other accountable business role or function?	X			

		IAM-10.2	Remediation must follow established user access policies and procedures.	Do you collect evidence to demonstrate that the policy (see question IAM-10.1) has been enforced?	X			In line with ISO standard and GDPR regulation, they are periodically audited on authorizations granted to ADS
		IAM-10.3		Do you ensure that remediation actions for access violations follow user access policies?	X			
		IAM-10.4		Will you share user entitlement and remediation reports with your tenants, if inappropriate access may have been allowed to tenant data?	X			
Identity & Access Management User Access	IAM-11	IAM-11.1	Timely de-provisioning (revocation or modification) of user access to data and organizationally-owned or managed (physical and virtual) applications, infrastructure systems, and network components, shall be implemented as per established policies and procedures and based on internal corporate or customer (tenant) user account credentials shall be restricted as per the following, ensuring appropriate identity, entitlement, and access management and in accordance with established policies and procedures: • Identity trust verification and service-to-service application (API) and information processing interoperability (e.g., SSO and Federation) • Account credential lifecycle management from instantiation through revocation • Account credential and/or identity store minimization or re-use when feasible • Adherence to industry acceptable and/or regulatory compliant authentication, authorization, and accounting (AAA) rules (e.g., strong/multi-factor, expireable, non-shared authentication secrets)	Is timely deprovisioning, revocation, or modification of user access to the organizations systems, information assets, and data implemented upon any change in status of employees, contractors, customers, business partners, or involved third parties?	X			SOLARI for its employees and partners has put in place procedures and processes in order to vary and revoke
		IAM-11.2		Is any change in user access status intended to include termination of employment, contract or agreement, change of employment or transfer within the organization?	X			
Identity & Access Management User ID Credentials	IAM-12	IAM-12.1		Do you support use of, or integration with, existing customer-based Single Sign On (SSO) solutions to your service?	X			On Client request, is possible to integrates with existing customers SSO solutions and uses industry standards
		IAM-12.2		Do you use open standards to delegate authentication capabilities to your tenants?	X			
		IAM-12.3		Do you support identity federation standards (e.g., SAML, SPML, WS-Federation, etc.) as a means of authenticating/authorizing users?	X			Only role based
		IAM-12.4		Do you have a Policy Enforcement Point capability (e.g., XACML) to enforce regional legal and policy constraints on user access?		X		
		IAM-12.5		Do you have an identity management system (enabling classification of data for a tenant) in place to enable both role-based and context-based entitlement to data?		X		Default authentication provider doesn't support multifactor authentication
		IAM-12.6		Do you provide tenants with strong (multifactor) authentication options (e.g., digital certs, tokens, biometrics, etc.) for user access?		X		
		IAM-12.7		Do you allow tenants to use third-party identity assurance services?		X		A specific password policy should be defined and documented
		IAM-12.8		Do you support password (e.g., minimum length, age, history, complexity) and account lockout (e.g., lockout threshold, lockout duration) policy enforcement?	X			
		IAM-12.9		Do you allow tenants/customers to define password and account lockout policies for their accounts?	X			
		IAM-12.10		Do you support the ability to force password changes upon first logon?	X			
		IAM-12.11		Do you have mechanisms in place for unlocking accounts that have been locked out (e.g., self-service via email, defined challenge questions, manual unlock)?	X			
Identity & Access Management Utility Programs Access	IAM-13	IAM-13.1	Utility programs capable of potentially overriding system, object, network, virtual machine, and application controls shall be restricted.	Are access to utility programs used to manage virtualized partitions (e.g. shutdown, clone, etc) appropriately restricted and monitored?	X			Systems component are monitoring in line with ISO standard
Infrastructure & Virtualization Security Audit Logging / Intrusion Detection	IVS-01	IVS-01.1	Higher levels of assurance are required for protection, retention, and lifecycle management of audit logs, adhering to applicable legal, statutory, or regulatory compliance obligations and providing unique user access accountability to detect potentially suspicious network behaviors and/or file integrity anomalies, and to support forensic investigative capabilities in the event of a security breach.	Are file integrity (host) and network intrusion detection (IDS) tools implemented to help facilitate timely detection, investigation by root cause analysis, and response to incidents?	X			WAF in place. We rely on the cloud provider infrastructure
		IVS-01.2		Is physical and logical user access to audit logs restricted to authorized personnel?	X			Logging and monitoring procedure
		IVS-01.3		Can you provide evidence that due diligence mapping of regulations and standards to your controls/architecture/processes has been performed?	X			Incident response procedure
		IVS-01.4		Are audit logs centrally stored and retained?	X			Audit logs are stored in secure storage
		IVS-01.5		Are audit logs reviewed on a regular basis for security events (e.g., with automated tools)?	X			Alerts are configured for key security events
Infrastructure & Virtualization Security Change Detection	IVS-02	IVS-02.1	The provider shall ensure the integrity of all virtual machine images at all times. Any changes made to virtual machine images must be logged and an alert raised regardless of their running state (e.g., dormant, off, or running). The results of a change or move of an image and the subsequent validation of the image's integrity must be immediately available to customers through electronic methods (e.g., portals or alerts).	Do you log and alert any changes made to virtual machine images regardless of their running state (e.g., dormant, off or running)?	X			Servers image are monitored and protected
		IVS-02.2		Does the virtual machine management infrastructure include a tamper audit or software integrity function to detect changes to the build/configuration of the virtual machine?	X			Production systems are monitored and audit log is collected in safety. Mechanisms are in place for identifying changes to the virtual machine configuration
		IVS-02.3		Are changes made to virtual machines, or moving of an image and subsequent validation of the image's integrity, made immediately available to customers through electronic methods (e.g., portals or alerts)?			X	Client do not interact with the hypervisor, physical infrastructure, image asset management
Infrastructure & Virtualization Security Clock	IVS-03	IVS-03.1	A reliable and mutually agreed upon external time source shall be used to synchronize the system clocks of all relevant information processing systems to facilitate tracing and reconstitution of activity timelines.	Do you use a synchronized time-service protocol (e.g., NTP) to ensure all systems have a common time reference?	X			Is used the NTP (Network Time Protocol)
Infrastructure & Virtualization Security Capacity / Resource Planning	IVS-04	IVS-04.1	The availability, quality, and adequate capacity and resources shall be planned, prepared, and measured to deliver the required system performance in accordance with legal, statutory, and regulatory compliance obligations. Projections of future capacity requirements shall be made to mitigate the risk of system overload.	Do you provide documentation regarding what levels of system (e.g., network, storage, memory, I/O, etc.) oversubscription you maintain and under what circumstances/scenarios?	X			There are monitoring systems in order to optimize the system performance to meet requirements on an ongoing basis regulations and contracts for all systems
		IVS-04.2		Do you restrict use of the memory oversubscription capabilities present in the hypervisor?		X		
		IVS-04.3		Does your system's capacity requirements take into account current, projected, and anticipated capacity needs for all systems used to provide services to the tenants?	X			
Infrastructure & Virtualization Security Management - Vulnerability	IVS-05	IVS-05.1	Implementers shall ensure that the security vulnerability assessment tools or services accommodate the virtualization technologies used (e.g., virtualization aware).	Is system performance monitored and tuned in order to continuously meet regulatory, contractual, and business requirements for all the systems used to provide services to the tenants?	X			Recommendations of the technologies used are considered
		IVS-05.2		Do security vulnerability assessment tools or services accommodate the virtualization technologies being used (e.g., virtualization aware)?	X			
Infrastructure & Virtualization Security	IVS-06	IVS-06.1	Network environments and virtual instances shall be designed and configured to restrict and monitor traffic between trusted and untrusted connections. These configurations shall be reviewed at least annually.	For your IaaS offering, do you provide customers with guidance on how to create a layered security architecture equivalence using your virtualized solution?			X	Periodically reviews and
		IVS-06.2		Do you regularly update network architecture diagrams that include data flows between security domains/zones?	X			

Network Security		IVS-06.3	and supported by a documented justification for use for all allowed services, protocols, ports, and compensating controls.	Do you regularly review for appropriateness the allowed access/connectivity (e.g., firewall rules) between security domains/zones within the network?	X			updates network architecture diagrams and each changes are
		IVS-06.4		Are all firewall access control lists documented with business justification?		X		
Infrastructure & Virtualization Security OS Hardening and Basic Protection	IVS-07	IVS-07.1	Each operating system shall be hardened to provide only necessary ports, protocols, and services to meet business needs and have in place supporting technical controls such as: antivirus, file integrity monitoring, and logging as part of their baseline operating build standard or baseline.	Are operating systems hardened to provide only the necessary ports, protocols, and services to meet business needs using technical controls (e.g., antivirus, file integrity monitoring, and logging) as part of their baseline build standard or template?	X			hardening best practices are for all hosts within the infrastructure
Infrastructure & Virtualization Security Production / Non-Production Environments	IVS-08	IVS-08.1	Production and non-production environments shall be separated to prevent unauthorized access or changes to information assets. Separation of the environments may include: stateful inspection firewalls, domain/realm authentication sources, and clear segregation of duties for personnel accessing these environments as part of their job duties.	For your SaaS or PaaS offering, do you provide tenants with separate environments for production and test processes?	X			Are maintained environments separate from production for testing. These environments are not accessible to clients
		IVS-08.2		For your IaaS offering, do you provide tenants with guidance on how to create suitable production and test environments?			X	
		IVS-08.3		Do you logically and physically segregate production and non-production environments?	X			Network segmentation is aligned. The production environment is completely segregated
Infrastructure & Virtualization Security Segmentation	IVS-09	IVS-09.1	Multi-tenant organizationally-owned or managed (physical and virtual) applications, and infrastructure system and network components, shall be designed, developed, deployed, and configured such that provider and customer (tenant) user access is appropriately segmented from other tenant users, based on the following considerations: • Established policies and procedures • Isolation of business critical assets and/or sensitive user data and sessions that mandate stronger internal controls and high levels of assurance • Compliance with legal, statutory, and regulatory compliance obligations	Are system and network environments protected by a firewall or virtual firewall to ensure business and customer security requirements?	X			All network and system environments are protected by firewalls in accordance with requirements ISO
		IVS-09.2		Are system and network environments protected by a firewall or virtual firewall to ensure compliance with legal, regulatory and contractual requirements?	X			Access to the infrastructure by clients is not allowed
		IVS-09.3		Have you implemented the necessary measures for the appropriate isolation and segmentation of tenants' access to infrastructure system and network components, in adherence to established policies, legal, statutory, and regulatory compliance obligations?			X	Data reside on separate database with common processing systems
		IVS-09.4		Do you have the ability to logically segment or encrypt customer data such that data may be produced for a single tenant only, without inadvertently accessing another tenant's data?	X			All network and system environments are protected by firewalls in order to meet security requirements in accordance with ISO standard standards, in addition to legislative, regulatory and contractual
		IVS-09.5		Are system and network environments protected by a firewall or virtual firewall to ensure protection and isolation of sensitive data?	X			
Infrastructure & Virtualization Security VM Security - Data	IVS-10	IVS-10.1	Secured and encrypted communication channels shall be used when migrating physical servers, applications, or data to virtualized servers and, where possible, shall use a network segregated from production-level networks for such migrations	Are secured and encrypted communication channels used when migrating physical servers, applications, or data to virtual servers?	X			Secured and encrypted communication channels are used. Work on the infrastructure that provides SOLARI applies the principle of least privilege, allowing your users of the systems that provide the SaaS platform only the access necessary for carry out their work duties
		IVS-10.2		Do you use a network segregated from production-level networks when migrating physical servers, applications, or data to virtual servers?			X	
Infrastructure & Virtualization Security VMM Security - Hypervisor Hardening	IVS-11	IVS-11.1	Access to all hypervisor management functions or administrative consoles for systems hosting virtualized systems shall be restricted to personnel based upon the principle of least privilege and supported through technical controls (e.g., two-factor authentication, audit trails, IP address filtering, firewalls, and TLS encapsulated communications to the administrative consoles).	Do you restrict personnel access to all hypervisor management functions or administrative consoles for systems hosting virtualized systems based on the principle of least privilege and supported through technical controls (e.g., two-factor authentication, audit trails, IP address filtering, firewalls and TLS-encapsulated communications to the administrative consoles)?	X			the SaaS platform back-end system environment is not directly accessible via a wireless network. Are in place the necessary measures to protect its network from unauthorized
Infrastructure & Virtualization Security Wireless Security	IVS-12	IVS-12.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to protect wireless network environments, including the following: • Perimeter firewalls implemented and configured to restrict unauthorized traffic • Security settings enabled with strong encryption for authentication	Are policies and procedures established and mechanisms configured and implemented to protect the wireless network environment perimeter and to restrict unauthorized wireless traffic?	X			Network architecture diagram exists. SaaS platform infrastructure utilizes a multi-tier design that segregates the database tier from web and application tiers using firewalls and network ACL
		IVS-12.2		Are policies and procedures established and mechanisms implemented to ensure wireless security settings are enabled with strong encryption for authentication and transmission, replacing vendor default settings (e.g., encryption keys, passwords, SNMP community strings)?	X			
		IVS-12.3		Are policies and procedures established and mechanisms implemented to protect wireless network environments and detect the presence of unauthorized (rogue) network devices for a timely disconnect from the network?	X			
Infrastructure & Virtualization Security Network Architecture	IVS-13	IVS-13.1	Network architecture diagrams shall clearly identify high-risk environments and data flows that may have legal compliance impacts. Technical measures shall be implemented and shall apply defense-in-depth techniques (e.g., deep packet analysis, traffic throttling, and black-holing) for detection and timely response to network-based attacks associated with anomalous ingress or egress traffic patterns (e.g., MAC spoofing and ARP poisoning attacks) and/or distributed denial-of-service (DDoS) attacks.	Do your network architecture diagrams clearly identify high-risk environments and data flows that may have legal compliance impacts?	X			As SaaS we rely on the qualified CSP that include these standards
		IVS-13.2		Do you implement technical measures and apply defense-in-depth techniques (e.g., deep packet analysis, traffic throttling and black-holing) for detection and timely response to network-based attacks associated with anomalous ingress or egress traffic patterns (e.g., MAC spoofing and ARP poisoning attacks) and/or distributed denial-of-service (DDoS) attacks?	X			
Interoperability & Portability APIs	IPY-01	IPY-01.1	The provider shall use open and published APIs to ensure support for interoperability between components and to facilitate migrating applications	Do you publish a list of all APIs available in the service and indicate which are standard and which are customized?	X			APIs by the SaaS platform are available and published
Interoperability & Portability Data Request	IPY-02	IPY-02.1	All structured and unstructured data shall be available to the customer and provided to them upon request in an industry-standard format (e.g., .doc, .xls, .pdf, .log, and .flat files)	Is unstructured customer data available on request in an industry-standard format (e.g., .doc, .xls, or .pdf)?	X			Data is exported in open standard formats
Interoperability & Portability Policy & Legal	IPY-03	IPY-03.1	Policies, procedures, and mutually-agreed upon provisions and/or terms shall be established to satisfy customer (tenant) requirements for service-to-service application (API) and information processing interoperability, and portability for application development and information exchange, usage, and integrity persistence.	Do you provide policies and procedures (i.e. service level agreements) governing the use of APIs for interoperability between your service and third-party applications?	X			The policies and procedures are released regulate the use of the SaaS platform Service and technical documentation for interoperability

		IPY-03.2		If using virtual infrastructure, do you allow virtual machine images to be downloaded and ported to a new cloud provider?		X		All the functions relating to the infrastructure hosting the SaaS platform can be managed only by technical staff.
		IPY-03.3		Do you provide policies and procedures (i.e. service level agreements) governing the migration of application data to and from your service?	X			At the contractual level, the policies and procedures are released regulate the use of the SaaS platform and with the support of the technical staff.
<b>Interoperability &amp; Portability</b> Standardized Network Protocols	IPY-04	IPY-04.1	The provider shall use secure (e.g., non-clear text and authenticated) standardized network protocols for the import and export of data and to manage the service, and shall make available a document to consumers (tenants) detailing the relevant interoperability and portability standards that are involved.	Is data import, data export, and service management be conducted over secure (e.g., non-clear text and authenticated), industry accepted standardized network protocols?	X			Interactions with the application (e.g., API calls, login, etc.) are encrypted in transit.
		IPY-04.2		Do you provide consumers (tenants) with documentation detailing the relevant interoperability and portability network protocol standards that are involved?	X			On request
<b>Interoperability &amp; Portability</b> Virtualization	IPY-05	IPY-05.1	The provider shall use an industry-recognized virtualization platform and standard virtualization formats (e.g., OVF) to help ensure interoperability, and shall have documented custom changes made to any hypervisor in use, and all solution-specific virtualization hooks, available for customer review.	Do you use an industry-recognized virtualization platform and standard virtualization formats (e.g., OVF) to help ensure interoperability?	X			
		IPY-05.2		If using virtual infrastructure, are machine images made available to the customer in a way that would allow the customer to replicate those images in their own off-site storage location?	X			On request
		IPY-05.3		Do you have documented custom changes made to any hypervisor in use, and all solution-specific virtualization hooks available for customer review?	X			Client do not interact
<b>Mobile Security</b> Anti-Malware	MOS-01	MOS-01.1	Anti-malware awareness training, specific to mobile devices, shall be included in the provider's information security awareness training.	Do you provide anti-malware training specific to mobile devices as part of your information security awareness training?		X		Refer on information security awareness, education and training policy. Mobile device security is part of the annual security awareness training.
<b>Mobile Security</b> Application Stores	MOS-02	MOS-02.1	A documented list of approved application stores has been communicated as acceptable for mobile devices accessing or storing provider managed data.	Do you document and make available lists of approved application stores for mobile devices accessing or storing company data and/or company systems?		X		It is recommended to loaded applications only from approved application stores
<b>Mobile Security</b> Approved Applications	MOS-03	MOS-03.1	The company shall have a documented policy prohibiting the installation of non-approved applications or approved applications not obtained through a pre-identified application store.	Do you have a policy enforcement capability (e.g., XACML) to ensure that only approved applications and those from approved application stores can be loaded onto a mobile device?		X		It is recommended to loaded applications only from approved application stores
<b>Mobile Security</b> Approved Software for BYOD	MOS-04	MOS-04.1	The BYOD policy and supporting awareness training clearly states the approved applications, application stores, and application extensions and plugins that may be used for BYOD usage.	Does your BYOD policy and training clearly state which applications and applications stores are approved for use on BYOD devices?			X	The use of BYOD devices is not allowed
<b>Mobile Security</b> Awareness and Training	MOS-05	MOS-05.1	The provider shall have a documented mobile device policy that includes a documented definition for mobile devices and the acceptable usage and requirements for all mobile devices. The provider shall post and communicate the policy and requirements through the company's website, user agreements and training sessions.	Do you have a documented mobile device policy in your employee training that clearly defines mobile devices and the accepted usage and requirements for mobile devices?		X		
<b>Mobile Security</b> Cloud Based Services	MOS-06	MOS-06.1	All cloud-based services used by the company's mobile devices or BYOD shall be pre-approved for usage and the storage of company business data.	Do you have a documented list of pre-approved cloud based services that are allowed to be used for use and storage of company business data via a mobile device?		X		It is recommended a list of approved cloud services that can be used for certain business uses.
<b>Mobile Security</b> Compatibility	MOS-07	MOS-07.1	The company shall have a documented application validation process to test for mobile device, operating system, and application compatibility issues.	Do you have a documented application validation process for testing device, operating system, and application compatibility issues?		X		
<b>Mobile Security</b> Device Eligibility	MOS-08	MOS-08.1	The BYOD policy shall define the device and eligibility requirements to allow for BYOD usage.	Do you have a BYOD policy that defines the device(s) and eligibility requirements allowed for BYOD usage?			X	Not allowed
<b>Mobile Security</b> Device Inventory	MOS-09	MOS-09.1	An inventory of all mobile devices used to store and access company data shall be kept and maintained. All changes to the status of these devices, (i.e., operating system and patch levels, lost or decommissioned status, and to whom the device is assigned or approved for usage (BYOD)), will be included for each device in the inventory.	Do you maintain an inventory of all mobile devices storing and accessing company data which includes device status (e.g., operating system and patch levels, lost or decommissioned, device assignee)?	X			Is limited to business devices
<b>Mobile Security</b> Device Management	MOS-10	MOS-10.1	A centralized, mobile device management solution shall be deployed to all mobile devices permitted to store, transmit, or process customer data.	Do you have a centralized mobile device management solution deployed to all mobile devices that are permitted to store, transmit, or process company data?		X		
<b>Mobile Security</b> Encryption	MOS-11	MOS-11.1	The mobile device policy shall require the use of encryption either for the entire device or for data identified as sensitive on all mobile devices and shall be enforced through technology controls.	Does your mobile device policy require the use of encryption for either the entire device or for data identified as sensitive enforceable through technology controls for all mobile devices?	X			Is limited to laptop
<b>Mobile Security</b> Jailbreaking and Rooting	MOS-12	MOS-12.1	The mobile device policy shall prohibit the circumvention of built-in security controls on mobile devices (e.g., jailbreaking or rooting) and is enforced through detective and preventative controls on the device or through a centralized device management system (e.g., mobile device management).	Does your mobile device policy prohibit the circumvention of built-in security controls on mobile devices (e.g., jailbreaking or rooting)?	X			
		MOS-12.2		Do you have detective and preventative controls on the device or via a centralized device management system which prohibit the circumvention of built-in security controls?		X		
<b>Mobile Security</b> Legal	MOS-13	MOS-13.1	The BYOD policy includes clarifying language for the expectation of privacy, requirements for litigation, e-discovery, and legal holds. The BYOD policy shall clearly state the expectations over the loss of non-BYOD and/or company owned devices are configured to require an automatic lockout screen, and the requirement shall be enforced through technical controls.	Does your BYOD policy clearly define the expectation of privacy, requirements for litigation, e-discovery, and legal holds?			X	The use of BYOD devices is not allowed
		MOS-13.2		Does the BYOD policy clearly state the expectations over the loss of non-company data in case a wipe of the device is required?			X	
<b>Mobile Security</b> Lockout Screen	MOS-14	MOS-14.1		Do you require and enforce via technical controls an automatic lockout screen for BYOD and company owned devices?			X	

Mobile Security Operating Systems	MOS-15	MOS-15.1	Changes to mobile device operating systems, patch levels, and/or applications shall be managed through the company's change management processes.	Do you manage all changes to mobile device operating systems, patch levels, and applications via your company's change management processes?		X		
Mobile Security Passwords	MOS-16	MOS-16.1	Password policies, applicable to mobile devices, shall be documented and enforced through technical controls on all company devices or devices approved for BYOD usage, and shall prohibit the changing of password/PIN lengths and authentication requirements.	Do you have password policies for enterprise issued mobile devices and/or BYOD mobile devices?		X		
		MOS-16.2		Are your password policies enforced through technical controls (i.e. MDM)?		X		
		MOS-16.3		Do your password policies prohibit the changing of authentication requirements (i.e. password/PIN length) via a mobile device?			X	All mobile devices and BYOD have required passwords
Mobile Security Policy	MOS-17	MOS-17.1	The mobile device policy shall require the BYOD user to perform backups of data, prohibit the usage of unapproved application stores, and require the use of anti-malware software (where supported).	Do you have a policy that requires BYOD users to perform backups of specified corporate data?			X	The use of BYOD devices is not allowed
		MOS-17.2		Do you have a policy that requires BYOD users to prohibit the usage of unapproved application stores?			X	
		MOS-17.3		Do you have a policy that requires BYOD users to use anti-malware software (where supported)?			X	
Mobile Security Remote Wipe	MOS-18	MOS-18.1	All mobile devices permitted for use through the company BYOD program or a company-assigned mobile device shall allow for remote wipe.	Does your IT provide remote wipe or corporate data wipe for all company-accepted BYOD devices?			X	
Mobile Security Security Patches	MOS-19	MOS-18.2		Does your IT provide remote wipe or corporate data wipe for all company-assigned mobile devices?			X	
		MOS-19.1	Mobile devices connecting to corporate networks or storing and accessing company information shall allow for remote software version/patch validation. All mobile devices shall have the latest.	Do your mobile devices have the latest available security-related patches installed upon general release by the device manufacturer or carrier?		X		It is recommended
		MOS-19.2		Do your mobile devices allow for remote validation to download the latest security patches by company IT personnel?		X		
Mobile Security Users	MOS-20	MOS-20.1	The BYOD policy shall clarify the systems and servers allowed for use or access on a BYOD-enabled device.	Does your BYOD policy clarify the systems and servers allowed for use or access on the BYOD-enabled device?			X	The use of BYOD devices is not allowed
		MOS-20.2		Does your BYOD policy specify the user roles that are allowed access via a BYOD-enabled device?			X	
Security Incident Management, E- Discovery, & Cloud Forensics Contact / Authority Maintenance	SEF-01	SEF-01.1	Points of contact for applicable regulation authorities, national and local law enforcement, and other legal jurisdictional authorities shall be maintained and regularly updated (e.g., change in impacted-scope and/or a change in any compliance obligation) to ensure direct compliance liaisons have been established and to be prepared for a forensic investigation requiring rapid engagement with law	Do you maintain liaisons and points of contact with local authorities in accordance with contracts and appropriate regulations?	X			In close collaboration with experts from national Authorities.
Security Incident Management, E- Discovery, & Cloud Forensics	SEF-02	SEF-02.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to triage security-related events and ensure timely and thorough incident management, as per established IT service management policies and procedures.	Do you have a documented security incident response plan?	X			Are developed plans, procedures and response programs to incident in according to ISO standard and GDPR
		SEF-02.2		Do you integrate customized tenant requirements into your security incident response plans?		X		
		SEF-02.3		Do you publish a roles and responsibilities document specifying what you vs. your tenants are responsible for during security incidents?	X			
		SEF-02.4		Have you tested your security incident response plans in the last year?	X			
Security Incident Management, E- Discovery, & Cloud Forensics Incident Reporting	SEF-03	SEF-03.1	Workforce personnel and external business relationships shall be informed of their responsibility and, if required, shall consent and/or contractually agree to report all information security events in a timely manner. Information security events shall be reported through predefined communications channels in a timely manner adhering to	Are workforce personnel and external business relationships adequately informed of their responsibility, and, if required, consent and/or contractually required to report all information security events in a timely manner?	X			
		SEF-03.2		Do you have predefined communication channels for workforce personnel and external business partners to report incidents in a timely manner adhering to applicable legal, statutory, or regulatory compliance obligations?	X			Communications with all parties take place through ordinary email service, system ticketing
Security Incident Management, E- Discovery, & Cloud Forensics Incident Response Legal Preparation	SEF-04	SEF-04.1	Proper forensic procedures, including chain of custody, are required for the presentation of evidence to support potential legal action subject to the relevant jurisdiction after an information security incident. Upon notification, customers and/or other external business partners impacted by a security breach shall be given the opportunity to participate as is legally permissible in the forensic investigation.	Does your incident response plan comply with industry standards for legally admissible chain-of-custody management processes and controls?	X			The response plans comply with ISO standards. SOLARI is available to collaborate
		SEF-04.2		Does your incident response capability include the use of legally admissible forensic data collection and analysis techniques?		X		
		SEF-04.3		Are you capable of supporting litigation holds (freeze of data from a specific point in time) for a specific tenant without freezing other tenant data?	X			using Snapshot
		SEF-04.4		Do you enforce and attest to tenant data separation when producing data in response to legal subpoenas?	X			Separation of tenant data is applied
Security Incident Management, E- Discovery, & Cloud Forensics Incident Response Metrics	SEF-05	SEF-05.1	Mechanisms shall be put in place to monitor and quantify the types, volumes, and costs of information security incidents.	Do you monitor and quantify the types, volumes, and impacts on all information security incidents?	X			Security incidents that include quantifying and monitoring types of incidents, volumes of activity are documented
		SEF-05.2		Will you share statistical information for security incident data with your tenants upon request?		X		Upon request and non-disclosure agreements
Supply Chain Management, Transparency, and Accountability	STA-01	STA-01.1	Providers shall inspect, account for, and work with their cloud supply-chain partners to correct data quality errors and associated risks.	Do you inspect and account for data quality errors and associated risks, and work with your cloud supply-chain partners to correct them?	X			Refer on Supplier relationships procedure. Formal guidelines and procedures covering the
		STA-01.2	Providers shall design and implement controls to mitigate and contain data security risks through proper separation of duties, role-based access, and least-privileged access for all personnel within your supply chain?	Do you design and implement controls to mitigate and contain data security risks through proper separation of duties, role-based access, and least-privileged access for all personnel within your supply chain?	X			
Supply Chain Management, Transparency, and Accountability	STA-02	STA-02.1	The provider shall make security incident information available to all affected customers and providers periodically through electronic methods (e.g., portals).	Do you make security incident information available to all affected customers and providers periodically through electronic methods (e.g., portals)?	X			Security incident information is communicated using confidentially agreed methods
Supply Chain Management,	STA-03	STA-03.1	Business-critical or customer (tenant) impacting (physical and virtual) application and system-system interface (API) designs and	Do you collect capacity and use data for all relevant components of your cloud service offering?	X			Monitors system capacity
		STA-03.2		Do you provide tenants with capacity planning and use reports?		X		
Supply Chain Management, Transparency, and Accountability Provider Internal	STA-04	STA-04.1	The provider shall perform annual internal assessments of conformance and effectiveness of its policies, procedures, and supporting measures and metrics.	Do you perform annual internal assessments of conformance and effectiveness of your policies, procedures, and supporting measures and metrics?	X			Based on ISO standards annually
Supply Chain Management, Transparency, and Accountability Third Party	STA-05	STA-05.1	Supply chain agreements (e.g., SLAs) between providers and customers (tenants) shall incorporate at least the following mutually-agreed upon provisions and/or terms:	Do you select and monitor outsourced providers in compliance with laws in the country where the data is processed, stored, and transmitted?	X			Any agreements with third parties are examined by the Legal and privacy office. Each supplier must declare where it will process
		STA-05.2	• Scope of business relationship and services offered (e.g., customer (tenant) data acquisition, storage and usage, feature sets, and	Do you select and monitor outsourced providers to ensure that they are in compliance with applicable legislation?	X			
		STA-05.3		Does legal counsel review all third-party agreements?	X			

Agreements		STA-05.4	(tenant) data acquisition, exchange and usage, feature sets and functionality, personnel and infrastructure network and systems components for service delivery and support, roles and responsibilities of provider and customer (tenant) and any subcontracted or outsourced business relationships, physical geographical location of hosted services, and any known regulatory compliance considerations) • Information security requirements, provider and customer (tenant) primary points of contact for the duration of the business relationship, and references to detailed supporting and relevant business processes and technical measures implemented to enable effectively governance, risk management, assurance and legal, statutory and regulatory compliance obligations by all impacted business relationships • Notification and/or pre-authorization of any changes controlled by the provider with customer (tenant) impacts	Do third-party agreements include provision for the security and protection of information and assets?	X			Security system was designed and implemented to meet industry best practices on security in line with ISO standard. Audits and questionnaires are implemented towards suppliers aimed at verifying their maturity with respect to security issues
		STA-05.5	• Timely notification of a security incident (or confirmed breach) to all customers (tenants) and other business relationships impacted (i.e., up- and down-stream impacted supply chain)	Do you have the capability to recover data for a specific customer in the case of a failure or data loss?	X			Backup and data restore procedures are defined, documented and clearly linked to roles and responsibilities
		STA-05.6	• Assessment and independent verification of compliance with agreement provisions and/or terms (e.g., industry-acceptable certification, attestation audit report, or equivalent forms of assurance) without posing an unacceptable business risk of exposure to the organization being assessed	Do you have the capability to restrict the storage of customer data to specific countries or geographic locations?	X			Datecenter located on the Italian territory and in the European regions
		STA-05.7	• Expiration of the business relationship and treatment of customer (tenant) data impacted	Can you provide the physical location/geography of storage of a tenant's data upon request?	X			The location of the data is communicated in advance
		STA-05.8	• Customer (tenant) service-to-service application (API) and data interoperability and portability requirements for application development and information exchange, usage, and integrity persistence	Can you provide the physical location/geography of storage of a tenant's data in advance?	X			
		STA-05.9		Do you allow tenants to define acceptable geographical locations for data routing or resource instantiation?		X		
		STA-05.10		Are systems in place to monitor for privacy breaches and notify tenants expeditiously if a privacy event may have impacted their data?	X			Incidents and personal data breaches are recorded along with details regarding the event and subsequent mitigation actions performed
		STA-05.11		Do you allow tenants to opt out of having their data/metadata accessed via inspection technologies?		X		
		STA-05.12		Do you provide the client with a list and copies of all subprocessing agreements and keep this updated?	X			Customers can request copies of the agreements between parties / people involved
Supply Chain Management, Transparency, and Accountability Supply Chain Governance	STA-06	STA-06.1	Providers shall review the risk management and governance processes of their partners so that practices are consistent and aligned to account for risks inherited from other members of that partner's cloud supply chain.	Do you review the risk management and governance processes of partners to account for risks inherited from other members of that partner's supply chain?	X			Are maintained agreements with key third party suppliers
Supply Chain Management, Transparency, and Accountability Supply Chain Metrics	STA-07	STA-07.1	Policies and procedures shall be implemented to ensure the consistent review of service agreements (e.g., SLAs) between providers and customers (tenants) across the relevant supply chain (upstream/downstream). Reviews shall be performed at least annually and identify non-conformance to established agreements. The reviews should result in actions to address service-level conflicts or inconsistencies resulting from disparate supplier relationships.	Are policies and procedures established, and supporting business processes and technical measures implemented, for maintaining complete, accurate, and relevant agreements (e.g., SLAs) between providers and customers (tenants)?	X			Processes/Procedures related to the processing of personal data are documented. Periodically Service agreement are reviewed
		STA-07.2		Do you have the ability to measure and address non-conformance of provisions and/or terms across the entire supply chain (upstream/downstream)?	X			The supply chain is regulated by contractual requirements. The security policy can perform on-site audit, if necessary
		STA-07.3		Can you manage service-level conflicts or inconsistencies resulting from disparate supplier relationships?	X			Periodically reviews service level agreements
		STA-07.4		Do you provide tenants with ongoing visibility and reporting of your operational Service Level Agreement (SLA) performance?	X			Upon request
		STA-07.5		Do you make standards-based information security metrics (CSA, CAMM, etc.) available to your tenants?	X			Upon request
		STA-07.6		Do you provide customers with ongoing visibility and reporting of your SLA performance?	X			Upon request
		STA-07.7		Do your data management policies and procedures address tenant and service level conflicts of interests?	X			The roles are defined contractually
		STA-07.8		Do you review all service level agreements at least annually?	X			
		STA-08.1	Providers shall assure reasonable information security across their information supply chain by performing an annual review. The review	Do you assure reasonable information security across your information supply chain by performing an annual review?	X			
		STA-08.2	Does your annual review include all partners/third-party providers upon which your information supply chain depends?		X			Key suppliers are validated
Supply Chain Management, Transparency, and Accountability Third Party Audits	STA-09	STA-09.1	Third-party service providers shall demonstrate compliance with information security and confidentiality, access control, service definitions, and delivery level agreements included in third-party contracts. Third-party reports, records, and services shall undergo audit and review at least annually to govern and maintain compliance with the	Do you mandate annual information security reviews and audits of your third party providers to ensure that all agreed upon security requirements are met?	X			Upon request
		STA-09.2		Do you have external third party services conduct vulnerability scans and periodic penetration tests on your applications and networks?	X			An external auditor performs an audit, in accordance with specific laws e internal regulation
Threat and Vulnerability Management Antivirus / Malicious Software	TVM-01	TVM-01.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to prevent the execution of malware on organizationally-owned or managed user end-point devices (i.e., issued workstations, laptops, and mobile devices) and IT infrastructure network and system components	Do you have anti-malware programs that support or connect to your cloud service offerings installed on all of your IT infrastructure network and systems components?	X			Anti-malware are installed on virtual machines
		TVM-01.2		Do you ensure that security threat detection systems using signatures, lists, or behavioral patterns are updated across all infrastructure components as prescribed by industry best practices?	X			Server based anti-malware systems are automatically updated
Threat and Vulnerability Management Vulnerability / Patch Management	TVM-02	TVM-02.1	Policies and procedures shall be established, and supporting processes and technical measures implemented, for timely detection of vulnerabilities within organizationally-owned or managed applications, infrastructure network and system components (e.g., network vulnerability assessment, penetration testing) to ensure the efficiency of implemented security controls. A risk-based model for prioritizing remediation of identified vulnerabilities shall be used. Changes shall be	Do you conduct network-layer vulnerability scans regularly as prescribed by industry best practices?	X			Network-layer vulnerability scanning is done regularly by third-party providers
		TVM-02.2		Do you conduct application-layer vulnerability scans regularly as prescribed by industry best practices?	X			Application-layer vulnerability scans are conducted at least annually by third-party

		TVM-02.3	remediation or identified vulnerabilities shall be used. Changes shall be managed through a change management process for all vendor-supplied patches, configuration changes, or changes to the organization's internally developed software. Upon request, the provider informs customer (tenant) of policies and procedures and identified weaknesses especially if customer (tenant) data is used as part the service and/or customer (tenant) has some shared responsibility over implementation of control.						Operating system-layer vulnerability scans are conducted at least annually by third-party On request, under NDA
		TVM-02.4			X				Software patches should be tested and evaluated before they are installed in an operational environment
		TVM-02.5			X				Summary report on Client request
		TVM-02.6			X				SOLARI does not allow Clients to manage client applications
Threat and Vulnerability Management	TVM-03	TVM-03.1	Policies and procedures shall be established, and supporting business processes and technical measures implemented, to prevent the execution of unauthorized mobile code defined as software transferred	Do you conduct local operating system-layer vulnerability scans regularly as prescribed by industry best practices?	X				
		TVM-03.2		Will you make the results of vulnerability scans available to tenants at their request?	X				
				Do you have a capability to patch vulnerabilities across all of your computing devices, applications, and systems?	X				
				Do you inform customers (tenant) of policies and procedures and identified weaknesses if customer (tenant) data is used as part the service and/or customer (tenant) has some shared responsibility over implementation of control?	X				
				Is mobile code authorized before its installation and use, and the code configuration checked, to ensure that the authorized mobile code operates according to a clearly defined security policy?				X	
				Is all unauthorized mobile code prevented from executing?				X
